Excellus BCBS Offers Protection for Affected Individuals Following Cyberattack

Rochester, N.Y. – Excellus BlueCross BlueShield (“Excellus BCBS”) announced today that its Information Technology (IT) systems were the target of a sophisticated cyberattack and steps are being taken for the protection of its members and individuals who do business with the health plan.

As a result of cyberattacks on other insurance companies, Excellus BCBS engaged FireEye’s Mandiant incident response division, one of the world’s leading cybersecurity firms, to conduct a forensic assessment of its IT systems. On August 5, 2015, Excellus BCBS learned that cyber attackers gained unauthorized access to its IT systems.

Excellus BCBS notified the FBI and is cooperating with the bureau’s investigation.

“Protecting personal information is one of our top priorities and we take this issue very seriously,” said Christopher Booth, the corporation’s chief executive officer. “We’re making a broad range of services available today for our members, our employees and other impacted individuals to help protect their information.”

The investigation has not determined that personal information on the company’s IT systems was removed or used inappropriately. However, the investigation has determined that attackers may have gained unauthorized access to approximately 7 million individuals’ information, which could include name, date of birth, Social Security number, mailing address, telephone number, member identification number, financial account information and claims information.

Excellus BCBS is beginning to mail letters to affected individuals today and is providing two years of free identity theft protection services through Kroll, a global leader in risk mitigation and response solutions, including credit monitoring powered by TransUnion. A dedicated call center also has been set up for members and other affected individuals. And, the company has established a dedicated website (www.excellusfacts.com), where members and other affected individuals can view frequent questions and answers and sign up for the free credit monitoring service and identity theft protection services. Individuals who believe they are affected by this cyberattack but who have not received a letter by November 9, are encouraged to call the number listed at that website.

“We have already taken aggressive steps to remediate our IT system of issues raised by this cyberattack,” Booth said.

“We sincerely regret any concern this may cause,” said Booth. “We are providing free credit monitoring and identity theft protection to you for peace of mind. We also pledge to take additional steps to strengthen and enhance security to help avoid having something like this happen again.”

NOTICE OF CYBERATTACK AFFECTING EXCELLUS BLUECROSS BLUESHIELD

On August 5, 2015, Excellus BlueCross BlueShield learned that cyberattackers had executed a sophisticated attack to gain unauthorized access to our Information Technology (IT) systems. Our investigation further revealed that the initial attack occurred on December 23, 2013. As part of our own investigation, we notified the FBI and are coordinating with the Bureau's investigation into this attack.

We worked closely with Mandiant, one of the world's leading cybersecurity firms, to conduct our investigation and to remediate the issues created by the attack on our IT systems. We are taking additional actions to strengthen and enhance the security of our IT systems moving forward.

Our investigation determined that the attackers may have gained unauthorized access to individuals' information, which could include name, date of birth, Social Security number, mailing address, telephone number, member identification number, financial account information and claims information. This incident also affected members of other Blue Cross Blue Shield plans who sought treatment in the 31 county upstate New York service area of Excellus BCBS. Individuals who do business with us and provided us with their financial account information or Social Security number are also affected.

The investigation has not determined that any such data was removed from our systems. We also have no evidence to date that such data has been used inappropriately.

We recognize this issue can be frustrating and we are taking steps to protect you. We are beginning to mail letters to affected individuals today, September 9. We are providing two years of free identity theft protection services through Kroll, a global leader in risk mitigation and response solutions, including credit monitoring powered by TransUnion, to affected individuals. We also have established a dedicated call center for affected individuals to contact with any questions. Individuals who believe they are affected by this incident but who have not received a letter by November 9, are encouraged to call 1-877-589-3331, Monday through Friday, between 8:00 a.m. and 8:00 p.m. Eastern Time (closed on U.S. observed holidays).

We sincerely regret the frustration and concern this incident may cause. We want you to know that protecting your information is incredibly important to us, as is helping you through this situation with the information and support you need.
